

COMPLIANCE HAS NEVER BEEN EASIER

One of the biggest challenges for fleets these days is the continuous struggle to keep your vessels up-to-date and compliant.

Not only may non-compliance lead to costly fines or even detention, it could also endanger the ship, the owner and its seafarers!

Compliance is key for safe navigation, so why is it so hard?

Maintaining the paper library of mandatory publications on board is a tedious, time-consuming task.

Staying up to date with the latest editions, amendments and supplements, making sure new editions are ordered and onboard on time for the next inspection, keeping track of where a book is stored... it requires a huge administration and upkeep.

Not to mention the valuable space needed for storing all these paper books. It is costing your crew time and effort, and it is costing your fleet money.

Introducing CT NavReader

Bogerd Martin provides vessels an easy, time-saving solution to this problem with CT NavReader. The platform gives you access to one of the largest collections of

maritime publications and e-books from various publishers such as IMO, ITU, Browns, etc. into one single application.

CT NavReader offers a simple, user-friendly interface with one-click updating. The catalogue shows you all the publications available for purchase while your personal library gives you total visibility of the purchased books onboard.

Updates and amendments are highlighted, ensuring the latest content is always available.

Time efficient

No more wasting time by manually searching for a paper book, CT NavReader stores them all in one place, in a fast and easy to use digital format. Once purchased, the publications are immediately available, so no more waiting for shipments to arrive on board.

The optimised search and filter categories help you to quickly and easily find the information and publications you need. You can search by publication title, publishers, language and book category.

Compliant & integrated

In the event of a vessel inspection, compliance is assured. All mandatory

publications are available, at all times. There is no need to manually keep track of new editions.

CT NavReader integrates with CT Navigator Suite on board and can easily be activated.

Take your digitalisation even further with:

CT NavLog

An intuitive digital logbook system which replicates the look and feel of your paper logbooks and allows you to digitalise your fleet, one logbook at a time.

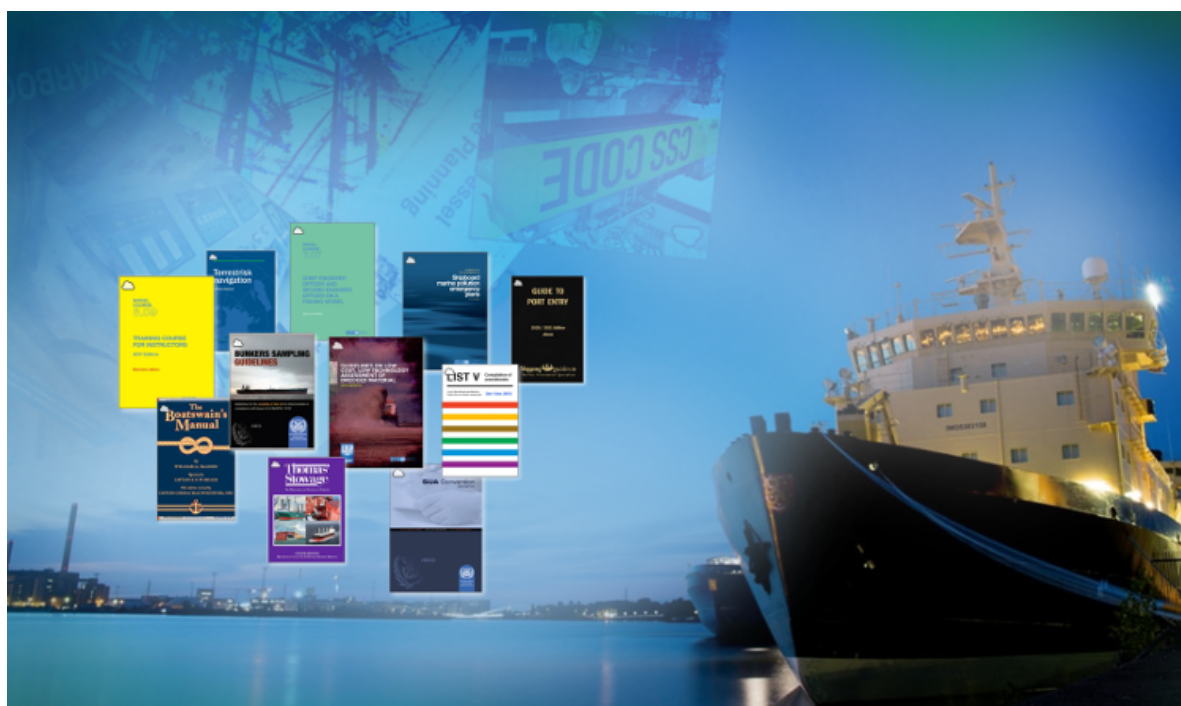

Marine Regulations

A maritime solution for offices and vessels which need to keep an up-to-date library of important rules and regulations.

Staying up-to-date and compliant has never been easier!

Bogerd Martin has been serving mariners worldwide for more than 100 years. Our extensive experience, as well as continuous investment in research and development, makes us the ideal partner to help your fleet adapt to the challenges of modern-day shipping.

Whether it is with personalised service, cutting-edge technology or custom solutions, in a sea of digital changes Bogerd Martin provides a steady and stable haven for you and your fleet.
