

Agile Voyage  
Planning System

- Create Passage Plans on the go
- View your licensed ENC's
- Automated Hazard Checking
- Aid to navigation when ECDIS fails
- Built in free weather service by NOAA
- Download updates via the internet
- DNV-GL Approved software
- Display Piracy information
- Integrated ADP products overlay

The Chart Track C-Tab offers ship crews the power to create fully comprehensive passage plans anywhere and at any time on the vessel. All AVCS charts purchased for your ship are displayed in a well organized ENC viewer and allows for the passage plans to be automatically hazard checked, just as the ECDIS would.

In addition to viewing the charts, layers such as ADRS, ATT, ADLL, Piracy and weather are available for use, from the preinstalled EasyNav software. Adding the Instrumentation license pack allows the C-Tab to function exactly like the ECDIS on board, ensuring the availability of navigational means, even if all else fails.

**C-TAB**

- Sturdy design
- Protected from falling damage
- Convenient hand strap
- Built in table mount
- 360 degrees rotation
- High durability screen protector
- Dust and droplet proof
- Individual silicon port covers

Not only is the C-Tab your mobile solution to passage planning and hazard checking, it is also designed to be used in a marine environment. With its military grade protective case, it is safe to use on board your vessel.

The case provides ample protection for most occasional incidents and is agile in every sense of the word. It's a must have tool for maritime professionals that don't want to be restricted to any one place on their ship during the preparation of their voyages.
