

## HAPPY #WORLDHYDROGRAPHYDAY!

21 JUNE 2024

Yesterday, we had the pleasure of attending the 'World Hydrography Day' workshop hosted by the @Hydrographic Society Benelux. It was an enriching experience with engaging presentations and discussions featuring **Kevin Verelst** from **agentschap Maritieme Dienstverlening en Kust (MDK)**, **Piet Leeuwerck** from **VLOOT** and our own **Nelson Morais** from **BOGERD MARTIN**.

We explored a range of topics, from initial feedback on the Norbit i87s, to the challenges of achieving Green shipping targets, to voyage optimization and the critical importance of data in the hydrographic field.
