

Bogerd Martin NV and mariem solutions GmbH announce exclusive collaboration with the integration of MDLT data as part of Bogerd Martin's Chart Track Insights.

22nd of August 2024,

Bogerd Martin and mariem solutions GmbH are proud to announce their first collaboration, which involves a licensing agreement for Mariem Solutions' Mean Daily Low Temperature (MDLT) data layer and their web application, www.polarcodepass.com.

This partnership aims to enhance safe voyage planning for the growing market of shipping in polar waters. polarcodepass.com was developed by mariem solutions GmbH's founders to address the critical need for historical temperature data essential for safe navigation in these challenging environments.

polarcodepass.com is the first application to offer access to 10 year of historical temperature data, fully aligned with IMO Polar Code requirements.

It streamlines routine planning processes by evaluating periods and regions of safe passage along the entire route based on the vessel's temperature limitations.

Bogerd Martin and mariem solutions have laid the foundation for the full integration of polarcodepass.com into Bogerd Martin's CT Insights. This integration allows customers to plan with greater confidence, ensuring that their voyages in polar waters adhere to the highest safety standards.

Marius Kruse and Emmerich Reize, Founders and General Managers of mariem solutions, state:

"With the steady growth of shipping potential in polar waters, this collaboration marks a significant step forward in providing the maritime industry with a crucial tool to navigate these challenging environments safely. We are excited about the opportunities this partnership with Bogerd Martin presents and look forward to a successful collaboration."

Céline Mortier, CEO of Bogerd Martin – Chart Track, adds:

"The integration of the MDLT data and Polar Code Pass application into our CT Insights platform will enable shipping companies to optimize route validation and better align their vessels with IMO Polar Code requirements. We eagerly anticipate our partnership with Marius and Emmerich."

About Bogerd Martin N.V.:

Established in 1911, Bogerd Martin is a renowned international chart agent serving shipping companies worldwide. Our global network covers nearly every part of the world, with distribution centers in Antwerp/Belgium (HQ), Tianjin/China, Hong Kong, and Dubai, supported by sales offices in Athens and Shanghai (www.bogerdmartin.com).

Originally a supplier of Nautical Charts and Publications, we have successfully transitioned into a one-stop hub for all digital and paper navigational needs. We offer solutions on a global scale, ensuring that vessels receive critical navigational data whenever and wherever required.

At Bogerd Martin, we focus on adapting to the challenges of modern shipping, providing a steady and reliable presence in a rapidly changing digital landscape. We help our clients achieve compliance standards and work more efficiently through our Chart Track solutions (www.chartrack.com). We are committed to research, development, and the continuous improvement of our range of integrated solutions, products, and services to meet our clients' needs.

About mariem solutions GmbH:

mariem solutions GmbH benefits from its proximity to the maritime industry as well as the extensive understanding of processes on ships and the business background of the shipowner. Expert understanding of the regulations in the maritime sector on the one hand and many years of experience with information technology systems in the same environment complement the core capabilities of the founders.
