BOGERD MARTIN AND NORMEC VERIFAVIA ANNOUNCE A STRATEGIC PARTNERSHIP

20 DECEMBER 2024

Bogerd Martin and Normec Verifavia announce a strategic partnership to expand their service and respond to the demand of environmental compliance service. This collaboration integrates Bogerd Martin's new fleet operations platform - Chart Track Insights with Normec Verifavia advanced digital tools and emission verification services.

Advancing Emissions Data Integrity in the Face of Regulatory Demands

As global regulatory bodies such as the European Union Monitoring, Reporting, and Verification (EU MRV) system and the EU Emissions Trading Scheme (EU ETS) impose stricter emissions data standards, industries are under pressure to produce high-quality, verified data. This partnership provides stakeholders with seamless access to independently verified emissions figures that meet these high standards. The partnership integrates Bogerd Martin's Chart Track Insights with Normec Verifavia's proven expertise in third-party emissions verification, providing a comprehensive solution for both compliance and operational efficiency.

Unmatched Expertise and Industry Coverage

Normec Verifavia has built a reputation as a trusted verifier across multiple sectors, from aviation and maritime to road transport and rail. The company's rich legacy of over 10 years in the environmental verification space positions it as a leader in compliance verification and sustainability auditing. Normec Verifavia's independent verification services ensure that emissions data is credible, transparent, and meets the rigorous demands of regulatory frameworks.

Meeting regulatory requirements with minimal disruption

In response to the latest challenges in emission compliance, we are proud to introduce our next-generation fleet operation platform – Chart Track Insights. This innovative solution simplifies the

complex processes of reporting, monitoring, and verifying emissions, ensuring our customers can meet regulatory requirements with minimal disruption.

Through our strategic partnership with Normec Verifavia, we are enhancing our capabilities even further. Together, we integrate advanced digital tools and emission verification services to offer the most efficient and effective solutions for decarbonization and environmental compliance. Our customers will soon enjoy seamless, user-friendly solutions that make navigating the complexities of emission regulations easier than ever.

Quotes:

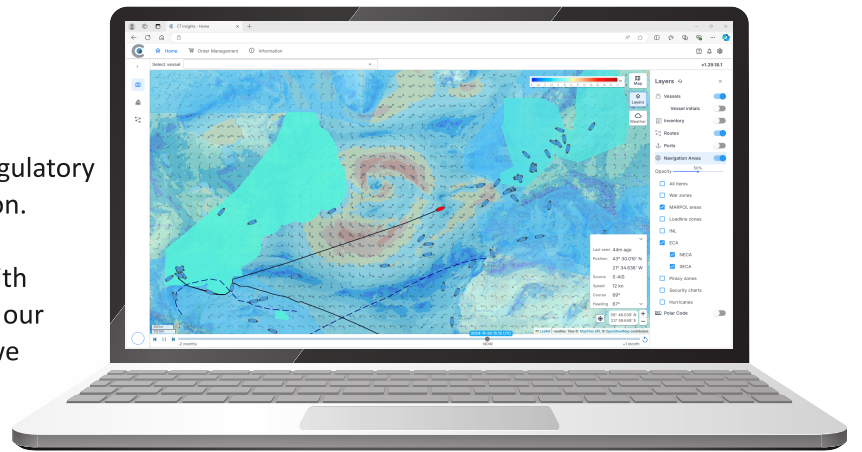

Céline Mortier, CEO of Bogerd Martin – Chart Track comments:

"Our partnership with Normec Verifavia is a significant milestone in our mission to empower the maritime industry with actionable, verified data for decarbonization. By integrating their renowned expertise in emissions verification with our Chart Track Insights platform, we are equipping our customers with unique insights and practical tools to optimize fleet operations and refine their sustainability strategies. Together, we are setting a new standard for environmental compliance and operational efficiency in an increasingly regulated world."

"At Normec Verifavia, we deliver independent emissions verification with unwavering commitment to impartiality. Our partnership with Bogerd Martin enhances our maritime sector services while maintaining strict independence in our verification processes. Through this collaboration, shipping companies can leverage ChartTrack Insights alongside our accredited verification services to streamline their compliance with EU MRV, EU ETS, and FuelEU Maritime regulations. This partnership demonstrates our dedication to facilitating transparent, verified emissions reporting while upholding the highest standards of auditor independence." – Nicolas Duchene, President & CEO, Normec Verifavia
